All places of business in Stony Plain will close at 1 o'clock every Wednesday afternoon during June, July and August. The Postoffice also closes at this time.

LOCAL NEWS.

Miss Mabelle Clarke left this week, for a visit with relatives in St Louis, Mo.

Mrs Chris Hein and two children, from Hay Lake, are visiting, this week, with Mrs Hein's parents, Mr and Mrs Jac Schram.

Miss M. Ashcroft, who had been visiting in Stony with her sister, Mrs James Malloch, left on Monday for her home in Scotland.

Mr J F Clarke spent the week-end at Jasper National Park.

Mrs Gonzales, a former resident of Inga district but recently of Toronto, is visiting at present, with her sister, Mrs C Witherspoon.

Mr and Mrs E J Robbins motored up from Donalds to Stony, to be present at Friday's big celebration.

Mr E J Kibblewhite, who has been principal at Stony Plain High School for the past three years, has resigned, and has, with Mrs Kibblewhite, taken up his residence in Edmonton. The popular principal intends enrolling at the University of Alberta when the Fall session opens. At the closing exercises at the school last week Mr Kibblewhite was presented with a handsome reading lamp by the staff and pupils, as a token of the esteem in which he is held.

Mr James Kelly and Mr John Kelly arrived in Stony yesterday, having come from Scotland.

A fiver arrived in Stony last week laden with four students from this district who have been attending Lutheran colleges in the United States. The party consisted of Messrs Philip Enders, Henry Hennig, W Ulmer, and P Unterschuetz.

The big crowd here on the holiday taxed Stony's eating-house accommodation to the limit; but all got fed—in time.

Stony Plain Town Council meets tonight.

The pupils of St. Matthew schools 1 and 2 held their annual picnic on Saturday, July 2, on the Fair Grounds, when games and other amusements for the children were the order of the day. Singing of appropriate songs was a feature of the day. A large representation of the parents was present.

One of the finest local exhibits at the recent celebration was the illuminated window display made by the Hardwick General Store. This was the best seen, so far, in Stony, and was very favorably commented on by the large crowds in town in the evenings.

GET IT AT HARDWICK'S

A Real Jubilee Sale of Men's Suits!

We have about 40 Men's Suits we are going to sacrifice.

The sizes are 46 44 42 40 38 39 37 36 35.

Genuine ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetate-acetylsalicylic Acid, (A. S. A.). While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Outdoors

The editor of this column steps aside this week to give place to the following "Four Minute Essay" by Dr. Frank Crane, and to commend it to all readers as well worthy of adoption:

A good dose of Outdoors would cure almost anything. Gett' wearing a hat and let your hair Outdoors, for that bald spot. Go barefoot, and your feet will slip back ten years. Take off your clothes and lie on the sand in the sun, acquire a rich tan, and you will become healthy as a savage. Go Outdoors and find a appetite. It's out there somewhere. Go Outdoors and get rid of Nerves. They live in the house. Other rats and mice that infest houses are Dyspepsia, Constipation, Liver Complaint, Peppiness and Neurosis. Not only Bodily Ailments, but all other kinds of plagues and nuisances are house creatures.

Creeds were all made in stuffy rooms. Religion, faith, hope, love, and courage inhabit the woods and meadows, sail the seas, and seek wind and sun.

Jesus taught Outdoors. Ecclesiastical Councils are held behind closed doors. The decline of religion is traceable from the Sermon on the Mount to the asphyxiating Meeting-House.

Education ought to be Outdoors. My favorite dream is the University of Outdoors, where pupils go shoeless and bathe and learn under the stars.

This University would teach the child how to be as healthy as a panther. And healthy bodies would obliterate most neurotic intellectual vagaries.

Where but Outdoors can you learn Botany, Geology, Astronomy, and the like. Real Science lives Outdoors, as much as Leap-Frog.

Play Outdoors. Prisoner's Base is better than Whist.

Even kissing is better Outdoors. "Copenhagen is much better for your general system than treading on the parlor sofa. When you chase a girl half a mile to kiss her you realize what real Kissing is."

Eating is better Outdoors. A horse is healthier than a man because a horse has to walk after every bite of grass he gets.

Outdoors is the solution of the Prison problem. From cell to sunshine means from the destruction to the reconstruction of the human waste-heap.

Inmate patients who are violent when locked up become peaceable Outdoors.

Children thrive Outdoors and pine in the house.

Outdoors is cheap and plenty.

God made Outdoors; man made Indoors.

And God lives Outdoors; in man-made edifices—Idols.

New Device for Motor Cars

Electric Brake Will Use Less Current Than Horn

The near future may see the adoption of an electric brake system on passenger cars that will require the least energy on the part of the driver to stop the heaviest type of machine within a short distance.

This type of brake is being manufactured for use on heavy trucks and trailers, and is being found more practicable than the mechanical type.

The apparatus requires less electricity to operate all four brakes on a heavy passenger car than is needed to run one headlight or to blow the horn once, it is said.

If a man is out of his head he is apt to put his foot in it.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother's Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; alleviating Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

Owens Pig With Two Mouths

Alberta Farmer Says Animal is Otherwise Normal

C. E. Henninger, a farmer, is the proud owner of a freak member of the swine family. The pig in question was born with two mouths, has two sets of teeth and two tongues but does not require double the amount of fodder. One of the mouths is stationary but both tongues move in unison. The creature appears to be normal in all other respects.

On one day the Henninger Farm saw an increase of thirty-nine animals within three hours. In all 25 pigs, a colt and ten chicks were born within that time.

"If every rancher had a similar increase, the country would be soon overstocked," Mr. Henninger humorously observed.

Plan to Shorten Voyage

Passengers Will Be Catapulted in Airplanes From French Liner. Passengers will soon be catapulted in airplanes from the deck of the Ile De France, latest addition to the French Line fleet, to cut short the voyage across the Atlantic ocean. It is announced in a cable to the French Line. The cable came from the Ile De France, which was en route to the United States on her maiden voyage. The plans call for the airplanes being shot from the liner off the Grand Banks whence they will carry passengers to seaboard cities of the United States and Canada.

The airplanes will now be added until the liner has made several trips.

Are you acquainted with any man who flatters his wife?

Prince Favors Playgrounds

Glad to See Movement to Provide Places for Poorer Children

The British National Playing Fields Association, which has issued an appeal for "£1,000,000 and many acres," states that there are in England 4,000,000 boys and girls who are without such facilities, and that many great cities have not a single football field or cricket pitch for the use of the poorer youths. The King on his birthday placed two of the Royal paddocks at Hampton Court, containing about six acres, at the disposal of the Association. In the absence of the Duke of York, who is president, the Prince of Wales on his return from the Derby visited a broadcasting station and gave a wireless talk in support of the movement.

As a lover of games himself, the Prince said that he was really glad to see on foot a movement to provide proper playing fields for these 4,000,000 boys and girls and that he hoped soon to see the day when not one of them could say, "I have nowhere to play."

Drives Out Rheumatism Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pains of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, penetrating pain remedy, one you can depend on, get a 5c. bottle of Nerviline today; it will make you well quickly."

Greatest Menace to Motorists

The two greatest menaces to the safety of motorists are the speed mania and the level crossing. When it is properly appreciated that roads are not race tracks and that level crossings are a species of death trap, the number of fatal accidents caused by the automobile will become practically negligible, at least in comparison with what has been the case the last few years.

Miller's Worm Powder acts mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in innumerable cases and have given relief to many children who, but for the good offices of this compound, would have continued weak and enfeebled.

The First Economy

A young man proposed to a girl and was accepted. After their first tender transports were over they fell into serious talk.

"Now that we are engaged," said the girl, "we must begin to economize. Promise me, darling, that you won't do anything you can't afford."

The young man laughed grimly.

"If I promised you that," he said, "I'd have to break off our engagement."

Great Britain, Canada, France and Italy have paid bonuses to their world war veterans.

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.F. No. 6, Simcoe, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it was to take

"I took only a few of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful blood purifying remedy has been on the market for the past 80 years; put up only by The T. Millburn Co., Limited, Toronto, Ont.

Urge Vaccination to Prevent Tuberculosis

French Doctors Would Have New Vaccine Given to All Children

The success obtained by the use of the anti-tubercular vaccine developed by Dr. Albert Calmette of the Pasteur Institute has led to a movement among French medical authorities in favor of the universal vaccination of children.

Results just tabulated up to the present year show that from 21,000 cases of vaccination with the Calmette vaccine, which is known as "B.C.G.," there have occurred only 1 per cent. of deaths from tuberculosis, while the tubercular mortality among unvaccinated children is shown by medical statistics to reach 26 per cent.

Professor Calmette explains that his vaccine does not inoculate the patient with the disease, but "suggests" the disease and routes anti-tubercular bacilli to activity. This has been done through use of vaccine obtained through rejecting the virulence of the tubercular bacilli by the tuberculing of weakened bacilli until an innocuous vaccine is evolved which is only strong enough to suggest tuberculosis in the system.

Early experiments were made with laboratory animals, and then with monkeys, over a period of thirteen years before the scientists of Pasteur Institute felt sure enough of the harmlessness of the vaccine to test the effect upon man. The vaccine should not be injected, but may be administered in food.

Despite the apparent success of this vaccine, French doctors report a general hostility upon the part of the public to anti-tubercular vaccination. The walls of the breathing tubes, and as those opposing vaccination for smallpox and typhoid. But an increasing number of physicians are becoming interested and the use of the vaccine has already spread to all countries of Europe.

Dust Causes Asthma. Even a little speck too small to see will lead to agencies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Russia Building Airplanes

Equipment of Soviets Increased by Sixty New Machines

An increase of more than sixty airplanes in the aerial forces of the Soviet union is announced as the result of a country-wide campaign conducted under the watchword, "Our answer to Chamberlain."

(This refers to the breaking off of diplomatic relations with Russia by Great Britain.)

Reports from 23 provincial cities published at Moscow announced the intention of the various unions in those places to construct from one to twelve aeroplanes each.

Leather leads in the building program.

First Voiceless Egg

Adolph Goldberg is an egg candler; he has been one for 20 years. But not until the other day did he ever see an egg with a voice. He took it to the Museum of Natural History, New York, where officials agreed that it was the first on record.

WEAK, LISTLESS GIRLS

Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health

When a girl in her teens becomes pale and sallow, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumbkin, Bala Island, N.S., will bring hope to other weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl, and I was in a run-down condition, with many of the attendant symptoms. I had been told of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well as strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Selling Deer Antlers

Reindeer have shed their antlers and native heremen at Nome, Alaska are busily gathering and transporting them to the coast for shipment to the north. The bone material is valuable for many articles of manufacture.

For Both House and Stable.—There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Eucalypti Oil is an excellent remedy for such ailments and mishaps in both human beings and the lower orders of animals.

At a depth of 66 feet the water of the Dead Sea is twice as salt as it is on the surface, and at 1,600 feet three times as salt.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

An electric shoe-polishing machine that shines both shoes automatically in about three minutes, has been developed.

KEEP QUIET!

That's good advice if you have Diarrhoea. Then for quick relief take a dose of or Chamberlain's Colic & Diarrhoea Remedy

THE NEW FRENCH REMEDY, N.S. **THERAPION**, N.S. **CHAMBERLAIN'S COLIC & DIARRHOEA REMEDY**

Irish Free State Making Progress As A Member Of The British Commonwealth

The only tangible bond linking together the members of the British Commonwealth of Nations since the Imperial Conference of last November is the British crown, or the person of the King, but Ireland has other interests, important among them, her economic status, which bind her to Britain and the commonwealth.

Timothy A. Smiddy, minister of the Irish Free State to the United States, said in a public address at the University of Chicago, Mr. Smiddy delivered one of the Norman Watt Harris lectures on the general subject of the British Empire.

"We have co-operation and no coercion, and the bonds which bind the various nations are intangible," the Irish minister said. "Whether these symbols signifying membership in an association of free nations are bonds which attach or bonds which chafe, is to be determined by future experience. Since the establishment of the Anglo-Irish treaty we have been free to work out our national life in our own way without help or hindrance from any outside source whatever."

"Nature has placed Ireland and Great Britain in close proximity with each other, which geographical contiguity begets for Ireland a relationship to Great Britain more intimate than that of any other member of the commonwealth. This relationship is exemplified economically by the market for Irish commodities. For instance, 58 per cent of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland, and 55 per cent of the imports of the Irish Free State are from Great Britain."

Speaking of the progress that has been made by the Irish Free State as an autonomous member of the Empire, Mr. Smiddy said: "If one of the tests of self-government is ability to insure stability, and to lay the foundations for an economic and cultural development that will create for the average citizen the opportunities for a full life, the people of the Irish Free State have already during the last five years amply justified their claim to be allowed to govern themselves."

Stubble Burning

Found to Be An Expensive Operation Under Best of Conditions

Burning of stubble has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed crops before they have entered the soil. Burning stubble is, however, an expensive operation even when the latest type of all burners is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner can sometimes be obtained, making the acre-cost of burning very low, but a fire of this kind can be obtained only in heavy stubble, which usually contains few weeds. Weedy stubble, it is observed, is almost always short and thin and will not carry a continuous fire, which is necessary if the weeds are to be destroyed.

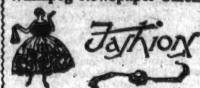

The 1926 report of the Swift Current Experimental Station, which can be obtained from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burners at work. The machine is drawn behind a rack from which straw is fed into a wide firebox. The firebox is made of sheet iron and is equipped with parallel grate-bars which slide over the stubble. A small gas engine is belted to a fan supplying a draft of air which blows the fire into the stubble. A 14-foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it going. From 40 to 50 cents per acre was found to be the cost of the labor of men and horses, while the gasoline cost 5 cents an acre.

Further trials of this machine are to be made before the Station is prepared to make any recommendations with respect to its efficiency.

"Dogs" from a blast furnace at an automobile manufacturing plant has been found to contain fifty per cent from ore, which is being reclaimed.

Saskatchewan Livestock Sales

Cattle Breeders' Association Hold Successful Sales at Prince Albert and Saskatoon

The Saskatchewan Cattle Breeders' association sales which were held at Prince Albert on June 7 and 8, respectively, proved to be quite successful. In all sixty-five head of pure bred stock were sold. The quality of the stock offered was good with the exception of a few individuals that did not sell. There was possibly too high percentage of just yearling bulls to obtain a very high average.

The Prince Albert sale, which was held on June 7, had an average of \$115.20. In the Shorthorn classes the junior yearling and grand champion Shorthorn bull, which was contributed by the Saskatchewan, institutional farms, Prince Albert, sold to J. T. Coombs, Pleasant Valley, for \$170. The senior champion bull was contributed by R. J. Huxtable and sold to G. W. Grigsby, of Tisdale.

In the Aberdeen Angus classes the junior and grand champion bull was contributed by Wm. D. Lyon, of Devon, and was purchased by J. G. Robertson, of the department of agriculture, Regina.

The grand champion Hereford was bred by T. A. Clark, of Lake Valley, and was a real good individual.

The Saskatoon sale proved to be more successful than the Prince Albert sale. In that the general average was \$118.40.

The sale was handled by J. W. Durno, of Calgary, and the judges were John Brandt, of Edenwald, and W. D. Lyon, of Devon.

Thirty-one Shorthorn bulls changed hands at an average price of \$137. The junior and grand champion was contributed by the University of Saskatchewan, Saskatoon, and sold to John Gordon, Richard, for \$215. The top price of the sale was received for the first prize senior yearling Shorthorn bull and was sold to the department of Indian Affairs for \$285.

The grand champion Aberdeen Angus bull was contributed by C. R. Wade, of Asquith, and was purchased by the livestock branch, Regina, while the grand champion Hereford bull was purchased by the department of Indian Affairs, Regina.

In the Holstein classes the aged bull, Strathmore Sir Donald Fairchild, contributed by John H. Clark, of Netherhill, was awarded the grand championship, and was sold to F. Walters, of Moose Jaw, for \$150.

The heaviest buyers at these sales was the livestock branch of the department of agriculture, and Mr. Christenson, of the department of Indian Affairs, Regina.

Hard on the Cook

New Cook: I can't get the dinner the way you told me to, ma'am.

Mistress: Why not?

New Cook: Didn't you tell me to have roast beef and gravy?

Mistress: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the beef but he didn't send a drop of gravy.

National Research Laboratories Will Assist In Applying Science To Industry In Canada

Canada Leading In Export of Wheat

Will Be Greater This Year Opinion of French Expert

Louis Louis-Dreyfus, a French banker and grain merchant, who is one of the leading authorities on wheat, recently gave an address to the French-American committee in Paris in which he declared that Canada was the greatest wheat-exporting country in the world, that the grain from the Dominion had no equal in quality except some of the Russian cereal, and that supplies available from Canada would continue to increase.

With established agencies in all wheat-producing countries in the world, including an agency at Vancouver, which he personally visited last year, Mr. Dreyfus predicted that the exports of wheat from the United States, Canada and Argentina would increase to 15,000,000 tons in 1927, against 14,000,000 tons in 1926. Of this total he put the shipments from the United States at 6,000,000 tons, those from Canada at 8,000,000, and those from Argentina at 4,000,000. He termed these super-producing countries—countries that produced more than they could consume.

He expressed the belief that France eventually would produce enough wheat to supply the demands of its people, but some time hence.

Cost of Operating a "Combine"

Combined Reaper and Thresher Effects Considerable Saving

In a normal season the combined reaper-thresher will cut and thresh wheat, oats, barley, fall rye and flax at a considerable saving over the binder and separator. Investigations have been made on this point at the Swift Current Experimental Station and the results are detailed in a Dominion Department of Agriculture pamphlet entitled "The Combined Reaper-Thresher in Western Canada." It was found that a sixteen-foot combine drawn by 12 horses will cut about 25 acres in a 10-hour day. Drawn by a tractor it cuts about 44 acres in the same time.

In the case of such a combine drawn by 12 horses and operating 20 days the cost per acre was \$1.80 or 9 cents a bushel on a 20 bushel per acre crop. In similar circumstances the cost of a tractor drawn machine was \$1.64 per acre and 8 cents per bushel. Compared with this harvesting with binder and separator cost 17 cents per bushel.

Parkes—"So your wife decided to learn to drive, too."

Sparkes—"Yes, she won't stop at anything."

The announcement from Ottawa of plans for the extension of scientific and industrial research will be welcome news to the business interests of the country. Canada has lagged far behind other nations in this work. In agricultural research great progress has been made. What has been accomplished has been worth millions of dollars to the country. But while other countries have added vast industrial wealth through research we have neglected to take advantage of opportunities which lie at hand, although Canadian industrial leaders have been keenly alive to the need and have urged Government action repeatedly.

According to the announcement, on a per capita basis, the appropriation made for this extension will place the Dominion on practical equality with other countries. The United States, Germany and Great Britain are spending sums yearly in applying science to industry and in standardization, thus securing the twofold advantage of eliminating waste and developing new processes which open fields for business hitherto unheard of. The expenditures have paid for themselves many times, just as the money spent here in developing new strains of wheat have returned fortunes. What is ahead in the reaping of harvests from our natural resources if this work is conducted along the proper lines may be imagined.

The establishment of national research laboratories available for the use of individual firms will open prospects which enterprising concerns will readily see. Large manufacturers are able to install their own laboratories, but in Canada in particular are many not financially able to do this, but who nevertheless would welcome facilities for experimentation. These the Government will now provide, and interested firms will gain the benefit at small cost.

Not the least advantage will be in the premium which is thus to be placed on initiative and enterprise. Business interests alert enough to take advantage of this opportunity will probably force ahead of their less aggressive competitors. There will be a search for new ideas and methods, while those satisfied with the routine of the past will lose out.

It is said that one of the objects of the visit to England of Hon. James Macdonald is to study British methods of research. He will there have the benefit of years of experience. It is gratifying to learn that Canada is at last to fall in line with this progressive movement.—Moose Jaw Times.

Michigan Supplies More Settlers for Western Canada Than Any Other State

The state of Michigan is apparently supplying more settlers for Western Canada than any other state in the union, according to figures submitted by Fred W. Kerr, Dominion immigration agent at Detroit, who has been in the west gaining first hand information of agricultural conditions here.

Many farmers have come from that state this year, he says. Last year, according to returns made public by U.S. authorities, Michigan sent 2,861 of the total of 21,025 farmers who left the States to take up land in Canada.

Egg Shell Not Fragile

An egg shell may be thin, but it is not fragile. An egg placed beneath the giant testing machine at the Bureau of Standards, Washington, withstood a pressure of 51 pounds before it was crushed. Two hundred tons was required to demolish a foot-square piece of timber.

Mr. Hensley—"Today is your birthday, dear, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"You already surprised." That is the first time in ten years that you remembered it."

So many shillings are put into London gas meters that a coin shortage often exists until meters can be cleared and the coins put into circulation again.

CANADA IN WASHINGTON

Home of Minister of the Dominion to the United States, Hon. Vincent Massey. The opening of the legation is one of the marks of Canada's progress in the jubilee year of Confederation.

GOVT. VICTORY IS NOW ASSURED IN MANITOBA

Winnipeg—Premier John Bracken and his Progressive supporters were returned to power in the provincial general election with a clear-cut mandate to guide the political destinies of Manitoba for another five years.

Indications are for a Government victory in 75 of the 85 seats in the Legislature, or equal to its representation at dissolution.

The striking feature of the election however, was the showing of the Conservative Party, which in standstill early campaign was credited with 15 seats, a gain of nine. Liberals appeared to have lost two seats, with only three candidates declared elected and two leading, while Labor appeared to have weathered the storm with its pre-dissolution representation unimpaired. The gains were chiefly made at the expense of the Independent group, which had only elected one member and was leading in two.

In the last hour the Independents had a vote of strength of eight.

The election of Manitoba appears to have registered a sweeping verdict in favor of extending the present facilities for the sale of beer. Winnipeg piled up a majority of approximately 15,000 for change in the beer laws and sale of beer by the glass in Government-licensed establishments likely will be the result. Proponents of the beer parlors outvoted those in favor of beer by the bottle under the "cash-and-carry" system by nearly two to one. Indication that the electors want the Government to continue its control over the distribution of intoxicants was shown in the defeat of the proposal which would have given the brewers the right to deliver beer direct to permit-holders.

Returning From England

Cabinet Ministers Will Sail for Canada

Ottawa—Hon. James Macdonald, Minister of Trade and Commerce, who is at present in England will sail for Canada on July 9, according to present plans. Mr. Macdonald has visited the offices of the trade commissioners for Canada in Great Britain and will inspect several of the offices on the continent before returning.

Hon. Robert Forke, Minister of Immigration, will sail for Canada, July 23. Mr. Forke has been several weeks in London involved in negotiations with the British Government for the extension of the 3,000-family settlement scheme as well as other immigration agreements.

This month, Hon. Charles Dunning, Minister of Railways, will make the trip to Hudson's Bay accompanying Frederick Palmer, the British engineer the Canadian Government has appointed to report on the comparative merits of Port Nelson and Port Churchill as a terminal for the Hudson's Bay Railway. Major Graham Bell, deputy minister, and Col. Duquesne, chief engineer of the department also will be in the party.

Ship License Cancelled

Panama—Panama Canal Morris at Vancouver, B.C., has been ordered to cancel the Panamanian registry of the ship Federalship which some time ago was seized by the American prohibition authorities and later released on the order of a Federal court. The Panamanian action was based on the non-payment of \$115 due to the National treasury for taxes. M. Morris reported that cancellation of the Panamanian registry had been solicited by the owners of the vessel.

Authorized to Fire Salutes

Ottawa—Edmonton has been added to the list of stations at which artillery salutes are fired on certain authorized occasions including Royal salutes on the Sovereign's birthday and Dominion Day, according to an announcement by the department of National Defence.

Receives Peace Prize

Oslo, Norway—Foreign Minister Strossmeyer of Germany has arrived here to receive the Nobel peace prize for 1925 which he shares with Foreign Minister Briand of France.

Canadians All

Mlle. Cartier Says Canadian Is a Title to Be Proud Of
Toronto.—After 53 years, Mlle. Horienne Cartier, daughter of one of the Fathers of Confederation, Sir Georges Etienne Cartier, returned to Toronto. Toronto was her childhood home between 1854 and 1859. When the Government moved to Quebec at that time she went with her father, and until today has never seen Toronto since.

Mademoiselle Cartier came from France as the guest of the Canadian Government to attend the celebration of the diamond jubilee of Confederation.

"One thing I do hope to see soon is the adjective 'French' dropped in French-Canadian," she said. "I think everyone should be just plain Canadian—and it is a title of which everyone should be very proud."

"I'm going through to the West and I am eager to get a feather crown. My father had a wonderful head dress and belt given him by the Indians."

Welcome Return of Royalty

Duke and Duchess of York Are Home After Six Months' Tour

London.—The British newspapers were filled with enthusiastic welcome to the Duke and Duchess of York upon their return from their six months tour to New Zealand and Australia. In connection with the welcome, are many references to the self-sacrifice of the Duchess of York in having left her infant daughter, Princess Elizabeth, for so long a period. One writer says this gives the Duchess a link of common understanding with all those other British wives and mothers whose husbands are called to visit or make homes in the outposts of the empire and who must choose between their husband and children.

Chinese Nationalists

Suffer Defeat

30,000 Casualties Reported After Four Days' Fighting

London.—A Shanghai despatch to Exchange Telegraph says the Chinese Nationalists admit suffering the heaviest reverse of the war at Suichow, North Western Kiangsu province.

Attacked by General Sun Chuan-fang and his Shantungese the Nationalists evacuated the city after four days fighting, in which they lost 30,000 men, mostly killed, and retreated 30 miles to Pongfu.

Killed in Air Crash

Flight Lieut. Anderson in Fatal Accident at High River

Calgary, Alta.—Flight Lieut. C. N. Anderson, Royal Canadian Air Force, was instantly killed when his plane crashed and burned at the High River Federal air patrol station.

The accident occurred as the flier was making a formation, a test flight for the Jubilee Celebrations being in progress.

The wrecked ship immediately burst into flames.

Anderson was 25 years old, unmarried, and his family resides in the Brandon district.

Retains Premiership

HON. JOHN BRACKEN, Premier of Manitoba, whose Government is returned to power.

TWO CLASSES FOR CRUISERS URGED NOW BY BRITAIN

Geneva, Switzerland.—Great Britain proposed to the technical committee of the tripartite naval conference that the cruisers be divided into two classes, one of 10,000 tons carrying eight-inch guns and the other of 7,500 tons with six-inch guns.

The United States and Japanese delegations requested time to examine the proposal "in the light of the effect it would have on the navies of each power concerned during the life of the treaty."

Some observers have expressed fears that the tripartite naval conference has reached a critical stage because the British and United States representatives have not yet been able to come together on the question of reopening the Washington treaty.

The Japanese have announced their inclination to support the British view on the question of limitation of the size and armament of battleships, consideration of which would mean re-discussion of problems thought to have been solved by the Washington treaty of 1922.

The determination of the United States delegates to restrict the conference to the scope outlined by President Coolidge's invitation to the powers remains unchanged.

Makes Parachute Descent

Toronto Girl Drops From Aeroplane As One Thousand Feet

Hamilton, Ont.—Miss Caroline Sykes, a Toronto office clerk, made what is known to be the first parachute descent from an aeroplane by a woman in Canada here when she stepped off an aeroplane 1,000 feet in the air and made a perfect landing on the top of a mountain.

Miss Sykes had been up in an aeroplane but once before. It is likely she will be employed to repeat the stunt daily at the Canadian National Exhibition in Toronto.

Dusting Wheat Fields

Will Use Aeroplanes to Control Dust by Spreading Chemicals

Fargo, N.D.—Aeroplanes for dusting wheat fields with "Dust," a chemical with which experiments are to be made in the hope that it will prevent or control black stem rust on wheat, will be used on an extensive scale in Manitoba and will be tried in a smaller way in Cass County, North Dakota. It was learned here.

T. M. Shields, officer of the Royal Canadian Flying Corps, spent Sunday here on route from Philadelphia to Winnipeg with a new aeroplane which he will use in dusting fields in Manitoba. It is planned to treat about 8,000 acres in the Canadian provinces.

Walter R. Reed, who is to make smaller experiments on his farm near Chatham, N.B., conferred with Mr. Shields regarding the proposed Canadian experiment. Mr. Reed will have experiments made on three different kinds of wheat dusting about 10 to 15-acre tracts of each.

Newspaper Men Elect Officers

Mr. Sam Wynn, Yorkton, New President of Weekly Newspaper Convention

Huntsville, Ont.—Sam Wynn, Yorkton, Sask., was elected president of the Canadian Weekly Newspapers Association at the concluding session of the annual meeting here. Other officers are: First vice-president, S. R. Andrus, Campbellton, N.B.; second vice-president, Hugh Savage, Duncan, B.C.; Directors include: British Columbia, R. E. White, Kamloops; H. G. Parsons, Golden, Alberta; Charles Clarke, High River; A. R. Ennis, Leduc, Saskatchewan; C. R. Macintosh, M.P., North Battleford; D. C. Dunbar, Estevan.

Transfer of Military Units

Several Western Units Will Change Location

Ottawa.—Re-location of a number of military units throughout Canada is announced by the department of national defence.

The Westminster Regiment, "C" Company, has been transferred from Mission to New Westminster, B.C. The Assiniboia Regiment, "C" Company, has been transferred from Manor to Indian Head, Sask.

Canadian Machine Gun Corps, No. 2 Company, machine-gun battalion, has been transferred from Nanaimo, B.C., to Mission, B.C.

Hungary's Wheat Crop Less

Ottawa.—According to a cablegram received from the International Institute of Agriculture at Rome, the wheat crop of Hungary is 63,734,000 bushels as compared with 69,200,000 last year and 71,674,000 in 1925. The cablegram also states that Hungary's rye crop is 25,531,000 bushels against 30,016,000 in 1925, and 32,525,000 in 1925.

Dr. Haanel Passes

Ottawa.—Dr. Eugene Haanel, for 20 years superintendent and director of music, died here recently, aged 86 years. He was internationally famous and held a number of degrees from Canadian and American universities.

UNITS OF EMPIRE AS ONE IN TIME OF COMMON PERIL

Chicago.—The British family of nations may "micker" among themselves but they will meet an outside menace with a united front, Sir Cecil Hurst, legal adviser to the British foreign office, told a University of Chicago audience during the second of a course of lectures on "Problems of the British Empire."

In this lies the claim of empire to be a total unit and international though foreign powers might question the reasonableness of treating the empire, as a unit in strength of the common allegiance to one king, Sir Cecil said.

"Families cannot be made by contract; they cannot be made or imposed by mere agreement of their members. The British empire has grown up together and as they become stronger, they may have become more self-contained more able to stand alone; but the ties which united them to the parent state remain intact."

British nations, Sir Cecil declared, will continue to act together in foreign affairs because the spirit of British autonomy is based on the admission that questions affecting the whole empire cannot be left to one member of the group to conduct without reference to others.

Equality of status among nations, as among individuals did not necessarily mean equality of stature, wealth or temperament. In the British Empire "equality" meant the absence of any power of control by one community over another. Some inequalities still exist between the powers of the British and Dominion governments but these were being swept away.

Crops Doing Well

Favorable Crop Report Covering All Western Areas

Winnipeg.—Since the completion of seeding operations weather conditions have been entirely favorable for growth, and crops are doing well almost everywhere, according to the weekly report issued by the Agricultural Department of the Canadian Pacific Railway. Earlier snow grains are practically as far ahead as at this time last year, with the grain sown later about a week ahead. A considerable percentage of the crop was put in unusually late, but with present weather conditions maintaining the rapid and healthy growth there should be no question of harvesting the crop within time this fall.

Outcrops have caused damage of a minor character at a few points, but the loss in this respect does not nearly approach the average. Hail has beaten down the crops over limited areas in a few localities in Saskatchewan and Alberta, but the grain was not sufficiently advanced to be permanently injured. The noticeable feature this year is found in the increased amount of new breaking undertaken, and the farmers are taking every advantage of the satisfactory soil moisture conditions.

Novel Flight Planned

London.—Mayor Moore announced that an invitation would be broadcast immediately to aviators to qualify for a non-stop flight from London, Ont., to London, England, for a prize of \$25,000 to be provided by a local brewery. A machine for the flight will be purchased by the same concern and handed over to the aviator as soon as one fully qualified, preferably a Canadian, has been found to undertake the trip.

Favor Amalgamation

Vancouver, B.C.—Ratepayers of Vancouver and South Vancouver by overwhelming majorities voted in favor of amalgamation of the two municipalities of South Vancouver and Point Grey.

Increase in Coal Output

Vancouver.—During the first four months of the year the coal output of British Columbia produced 354,236 long tons, an increase of 154,923 compared with the similar period of 1924.

Famous Explorer for Japan

Captain Roald Amundsen, famous Norwegian explorer, who has flown and sailed to the North Pole or its vicinity, is taking a trip to Japan and is here shown on board the Canadian Pacific liner Empress of Asia just before leaving for Yokohama from Vancouver, B.C. With him in the photograph are C. B. Stahlhamm, Norwegian consul at Vancouver and S. L. Prenter, of the Vancouver Harbor Commission. It is understood that Captain Amundsen is merely taking a holiday trip.

To Give You Service

The U. G. G. Elevator at your station is there to give you service, both in handling your grain and in furnishing farm supplies.

These farmer-owned elevators mean better returns for you in price and grade. The U. G. G. elevators set a standard which other companies have to meet.

U. G. G. elevators are there for the use and benefit of all farmers alike. Shareholders in the Company and farmers who are not shareholders all get the same service and treatment.

We don't claim to be perfect, but we do claim—and we believe justly—that the service given by U. G. G. elevators and by all departments of the business brings real financial benefit to farmers.

If you agree that this is a fair claim, we shall appreciate your business at your nearest U. G. G. Elevator.

Edmonton Exhibition.

In order that the Edmonton Exhibition July 18 to 23, this year, may be even better than that of 1929, the Exhibition Association are doing all in their power to stimulate the interest and enthusiasm of the people of Edmonton and surrounding districts.

There has been a \$5000 increase in the prize money, which now totals \$50,000, and new classes have been added in almost every section of the prize list. There are classes for horses, cattle, sheep, swine, poultry, dogs, cats, district exhibits, arts and crafts; and special classes for cooking and needle work for women and children.

Prize lists may be obtained free on request at Exhibition Offices in Arena building.

The newest Pageant, 1,000 people participating, will be something seldom seen outside the British Isles, where pageantry has reached the same of perfection—gorgeous costumes, clever acting, wonderful lighting effects; everything in this pageant will be perfect.

The Australian National Band will be the outstanding musical attraction of Edmonton Exhibition. Visitors are assured of the most interesting program ever seen at Edmonton Exhibition.

The Exhibition Association has arranged for a Free Camping Ground for auto parties of out of town Exhibition guests.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER III.—Continued

From this distance Helmi could think of her work in the hotel with greater composure. She knew she was awkward sometimes, and maybe stupid, though she always tried hard to please. Anyway, it was good to have a job, even if she had to pick roots of potatoes in a mouldy, dark cellar, and gather up the rotten ones to burn in the furnace.

Helmi had the large, restless hands which generations of hard-working women acquire, eager, capable, hands ready for anything that has to be done. Even the coarse, grubby hands which wasted few words of praise on her assistants, admitted grudgingly that the Finn girl "has good smart hands and makes every move tell"—if she could use her head as well, she'd do.

Helmi from the little bill on which she sat looked back at the smoky exit, lying like a great giant under its greasy, gray blanket of smoke. It reminded her uncomfortably of the blankets she had to spread every morning on the beds in the rear room of the hotel. In the front of the house she knew there were pleasant rooms, with white spreads and flowered wash-basins, but at the back a great yard of a room had what seemed like a hundred beds, spread with greasy blankets, and it was this room she had to sweep and tidy every day. Some days she found men still in bed when she went in, but having set out to tidy the room, Helmi held her tongue, taking no notice of the storm of abuse which came from the late sleepers.

Helmi's dreams that Sunday afternoon as she sat on the bank were for the most part pleasant. Consciousness of youth and bounding health made her hopeful of the future. She could work and still could learn, and she too would one day go back to Finland with a velvet bag, a long white plume, and silk linings and fringe on her gloves; and all the young people would gather round her, while she would tell of how she started, right at the bottom, washing ugly heavy dishes in a hotel.

Helmi always held the dream, too, that she might one day meet a prospector, maybe a rich man from Finland who had found gold. Men can do such wonderful things. Women have to work hard, but pretty girls have a good chance. Lots of Finn boys had come away to Canada, and maybe she might meet some of them. She thought of the Tricot who was in love with a poor girl and swore he would marry her and whose proud uncle sent him a lovely coat that had a great ugly patch of coarse cloth on it, meaning that if he married the poor girl she would be like the coarse

patch. That was a dirty thing for the old uncle to do. But what did the Prince do? He got the patch all embroidered with pearls and lovely jewels, and what it said signifying that his lovely poor girl would be the grandest thing about the place. Helmi guessed that held the uncle a while, maybe.

Helmi was so deep in her dreams she was unconscious of the approach of two young men. They were close upon her when she looked up. She did not like their appearance, but she felt no fear. There was strength in her right arm which brought assurance.

Helmi smiled and nodded to them as she would have if they had been two of the neighbors' boys at home. They said something to her in English.

"Yes," she said, because it was the only word she could think of—and then added—"No talk—Finn."

The boys laughed at that and looked at each other meaningly.

Helmi's young heart was a throb for adventure. If the young men had been dressed more elegantly she might have thought they were the successful gold-diggers of her dreams. But with a calculating eye she appraised them correctly. She spotted them to go on, which they interpreted to mean that they desired to go back to the city with them. When she began to walk away the boldest of the two followed her.

Helmi quickened her pace. The young fellow caught up to her and took her arm. She shook him off and began to run. The running thing always invites pursuit, and just as she expected, they followed. Helmi purposely let her pursuers gain on her, then, stopping and bracing her arm, she gave the first one a powerful body blow which sent him rolling down the bank towards the stream below. While the other one stopped to see what injury had been done to his friend, Helmi raced on. She was a frightened girl, not angry—she was all good run to her, but she knew enough to put as great a distance as she could between her and them for she suspected that the young man who had gone rolling down the muddy bank, might not be pleased with

A woman, driving a gray horse in a backboard, saw her coming and waited for her, deeply concerned to see the flying Helmi, who had evidently been set upon by two ruffians. Helmi sensed her concern, and climbed into the seat beside her without delay. Again came the difficulty of language. "Yale Hotel," said Helmi in answer to the unintelligible inquiries, giving the name the accent and pronunciation by the Swedish telephone girl of the hotel.

"Yell Hotel?" Why should anyone? All of which was lost on Helmi, who merely repeated the name of her present domicile.

Miss Abbie was distressed and greatly excited over the real adventure which had broken in upon her Sunday afternoon meditations. She had been making her weekly visit to the Girls' Friendly Home, where delinquent girls of the city lodged. The labors of the day were over. Miss Abbie had told the girls a beautiful story of a patient prisoner, held prisoner in a castle, who at last was set free by the ingenuity of her lover; and now as she drove home she was deep in a dream of golden romance.

Miss Abbie was a maiden lady of forty-eight years, thin, neat and proper, her only extravagance consisting in the number of ornaments she would hang around her neck. On the way that Helmi had bounded into her neat buggy Miss Abbie wore her Miller-guy suit of serge, with the chaste neck-piece of black fur crowned with a small hat of dove-tail and quills. All of this of course was most unobtrusive and ladylike; but hanging around her thin neck was a string of jet beads (her mother's), a gold chain (her father's), and a riot of miscellaneous articles suspended from the chain. There were keys and a kettie, a pencil which had never had lead in it, a little pig made of bog oak, with a silver ring in its back and a pierced silver urn.

In the little seven-roomed house where she lived the strictest order

Red Rose Tea, now packed in the bright, clean Aluminum package, is completely guaranteed. You can try it without any risk. Order a package from your grocer. Use any portion of it and if you are not entirely pleased return it and no charge will be made.

and precision prevailed everywhere on the piano, where the same promiscuous spirit asserted itself. There, photos and vases, fans and shells, books and pictures, old stones, painted bottles, Easter eggs, a Buddha idol, basket and candlesticks crowded and jostled each other for standing room.

Miss Abbie's life showed the same unevenness. Years of careful puritan living would suddenly give way to unexpected outbreaks of wild extravagance. After living in one room in the house of a friend she horrified her select circle by building a house of her own. With equal suddenness she left the class of immaculate maidens to the First Presbyterian Church to whom she expended from Sunday to Sunday the International Sunday School lessons and began her weekly visits to the Girls' Friendly Home.

Certain members of the Ladies' Aid Society said Miss Abbie was very deep, and that these strange outcroppings were but indications of her real nature. The minister's sister, who was something of a psychoanalyst, mentioned Jeerers in this connection, with their small percentage of victory as compared with their hidden volume.

Driving along the dusty summer road this Sunday afternoon, with the houses thickening on each side as they approached the city, Miss Abbie, deep of vision, carefully studied her new companion. She suddenly felt that she was about to experience another outcropping. An extravagant wish swelled her heart; a daring, unheard-of ambition convulsed her soul. . . . She would do it. No matter what any one said. Let the minister's sister rave. She would show them. She would adopt the girl if she could get her.

(To Be Continued.)

An Envious Position

Practically no Tuberculosis Among Dairy Cattle in Fraser Valley
Dr. W. H. McKenzie, superintendent of the Dominion health of animals branch, in British Columbia, is of opinion that there is practically no tuberculosis among dairy cattle in the Fraser Valley, B.C., will be practically eradicated within a year. Last year almost 8 per cent. were infected on test; this year's inspection showed a reduction of infection to 1.11 per cent. Next year he expects that the infection will be lower than one-half of one per cent. In this area. That is the rate officially regarded as T.B. free. Testing of herds from Hope to North Bend has been done, and of the 42,500 tested this year only 469 were condemned. Last year 4,328 out of 43,989 tested. This year he says, farmers in the Fraser Valley, realizing the value of healthy herds welcomed the veterinarians who conducted the test.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Had Several Reasons
A minister who had not been long appointed to a church in the South of Scotland asked one lady how she liked his preaching.
"I didn't like it at all," she answered.
"And, pray, why not?" he asked.
"Well, in the first place," she answered, "you read your sermon; and in the second place, you didn't read it well; and, in the third place, it wasn't worth the reading!"

ACHING JOINTS.
Apply Minard's a few times and note the quick relief.

The Emden in the Pictures

German War Film Being Shown in London

Evidence that feeling engendered by the War is dying down is forth coming from the fact that a German film illustrating the exploits of the Emden is being shown in London by an English firm who are best known as the distributors of the British films "Prison" and "Mons." Some people consider that they have taken a bold step in booking his wholly German war picture, but the film is so good and so impartial that there is no reason why British audiences should not welcome it on its merits.

The story begins with the Emden's departure from Tientsin at the outbreak of war, and winds up with a remarkably vivid portrayal of her final battle with H.M.S. Sydney, on Cocos Island. It is as restrained and as fair as any of the British war films, and has a stronger narrative force than any except that of Zeppelins. Without any unnecessary exaggeration of the glory or of the horrors of actual fighting, the War is shown from the angle of the crew of the German raider, and particularly from that of one young officer, a reservist in business at Tientsin, who meets his own wife as a passenger on one of the captured British steamers, is put in command of the captured British crews, and eventually dies during the bombardment by the Sydney.

Enough glimpses of her various exploits are shown to give one a pretty good idea of her touch and career, and the co-operation of the German admiralty has ensured an authentic naval atmosphere. One episode is omitted. That is the interval during the Cocos Battle when the Sydney, seeing the Emden hopelessly stranded, went off to capture her coal tender, the Bursak, before returning to enforce on Captain Von Muller an honorable surrender. The British are treated quite fairly; there is no "hate" anywhere in the picture.—London Correspondence in Free Press.

NO MEDICINE LIKE
BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine so equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.
Concerning the Tablets, Mrs. John Arnold, R. R. 1, South Monaghan, Ont., says: "We have three fine healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."
Baby's Own Tablets are a mild but thorough laxative which regulate the bowels, rid the child of constipation and indigestion; break up colds and simple fever, and make children easier after they are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Conan Doyle's Early Struggles

First Twelve Years of Literary Career Were Hard

Sir Arthur Conan Doyle, who was 65 years old recently, is found of recalling his own early struggles for the encouragement of budding story-tellers. Though he had a short story published in "Chamber's Journal"—first encouragement of so many famous writers—when only 19, he wrote for three years after that without an acceptance, and his early books brought but a small financial return. During the first twelve years of his literary career, indeed, he never made more than £58 per annum by his pen, and the first of the famous Sherlock Holmes series he sold outright, after numerous publishers had rejected it, for £25.

Girls Won in Competition

The one and only man in the butler making class of the Bath and West Agricultural Show took his hand at the churning when he competed against over a dozen shingled and silk-stocked dairymaids—and lost. The man was R. J. K. Elliott, from the Somersetshire Agricultural Society, and the class was for students who had been through a course of instruction in butter-making at a county school.

Enjoy a Real
Tour on Gum-
Dipped Tires

When you tour on Gum-Dipped Tires all roads seem equally good. There is nothing to compare with the smooth, sure performance of these big, low-pressure tires. Jots and vibrations disappear. Stretches of rough going cannot disturb you or harm the mechanism and well-built structure of your car.

If it is slippery and muddy underfoot, Gum-Dipped Tires, having double the road contact, cling to the road and hold the car unwaveringly to a true, straight course. On grades there is extra traction; at sharp curves or in quick stops you will have perfect control of wheel and brake. Skidding is almost impossible.

Through the development of the exclusive Gum-Dipping process, Firestone has tremendously increased tire mileage in balloons tires. This lossless and impregnates every fibre of every cord with rubber, reduces internal heat and friction and delivers thousands of extra miles with added comfort and safety.

Ask any Firestone Dealer to show you the structure of Balloon Gum-Dipped Tires and to tell you their advantages. He is a dealer in this type of tire and is in a position to serve you better and save you money. See him to-day.

Little Helps For This Week

Behold, we count them happy which endure.—James v. 11.

Well, to suffer is divine;

Pass the watchword down the line.

Pass the counterstrain, "Endure!"

Not to him who rashly dares,

But to him who nobly bears.

Is the victor's glad aura.

—John Greenleaf Whittier.

If for some of us, and sometimes

for all of us, action cannot mean

action, then remember bearing too is action—oftenest, the hardest part.

—William Channing Gannett.

Endure and dare, true heart:

through patience, joined with boldness,

come we at a crown encircled

with a thousand blessings.

—Spanish Proverb.

Experimenting on Dental Serum

That dentists soon may be injecting

serums to prevent tooth decay is the

prediction of a specialist in Chicago.

Dr. C. M. Johnson, who is experimenting

on such a preparation. Tooth decay,

he says, is the most common ailment known.

Many mothers have reason to bless

Mother Graves' Worm Exterminator,

because it has relieved the little ones

of suffering and made them healthy.

Pity may be able to love, but a girl

isn't willing to accept it as a substitute.

PIPES ON FACE
ITCHED BADLY

Skin Became Scaly, Arms Later Affected; Cuticura Heals.

"I suffered from pimples that cost me my work. My face was large and red, and itched so badly that I scratched them until they bled. My skin became scaly and started to peel off, especially around my mouth. Later my arms became itchy and red. I used Cuticura Soap and Ointment and they helped me. I continued the treatment and in about two weeks I was healed." (Signed) E. M. Bradley, 165 Queen St., Chicago, Ill., E. J., Aug. 4, 1924.

Use Cuticura Soap, Ointment and Talcum to promote and maintain skin purity, skin comfort and skin health; the Soap to cleanse and purify, Ointment to soothe and heal, and Talcum to powder and refresh.

Sample Soap Talcum and Ointment. Address: Cuticura, P.O. Box 1024, St. Louis, Mo.

Write for Cuticura Shaving Stick, etc.

DRAGGING-DOV
PAINS RELIEVED

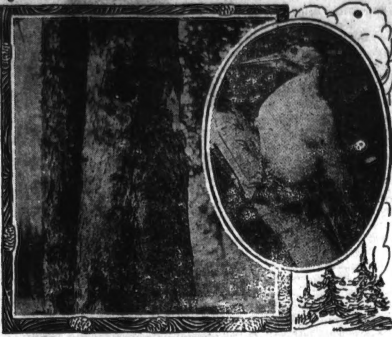

Woman Suffered Nearly a Year.
Lydia E. Pinkham's Vegetable Compound Brought Her Health.

Moore Jaw, Sask.—"I am going to try to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered very badly with dragging-down pains and inflammation, also pains in my legs and arms. I lay down my whole side into my hip. I had it nearly a year when I went to a doctor and he said I would have to have an operation. But my mother said to let Lydia E. Pinkham's Vegetable Compound as it saved her two lives before. I took two bottles and I found I was better, so I kept on taking it and also used Lydia E. Pinkham's Sensitive Wash. I have had two more children since then and am perfectly well. I used to have to lie down two or three times a day, and now I do all my housework without trouble. I always keep the Vegetable Compound in the house as I find a dose now and then helps me. I am sure you will use this letter any way you see fit and I will answer letters. If I can help any other woman I'd be only too glad to try."—Mrs. ESTHER HOGGARTH, 414 Morse Square, Moose Jaw, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for all women.

Woodpeckers' Convention at Banff

Typical Woodpecker hole in a fir tree. (Insert) Rare photograph of the Dilated Woodpecker.

One of his lectures delivered at the Douglas Fir and Spruce. Instinctively Banff Springs Hotel, Dan McCowan, the well-known Canadian naturalist, tells a wonderfully interesting story concerning a wild bird convention held in the Canadian Pacific Rockies during the fall of 1925. At that time the new Banff Springs Hotel was under construction and large numbers of structural steel workers were engaged in uprearing the fabric around which a dream palace had been evolved. There was the loud clanging of steel as the heavy girders were lifted and guided into place. Winches rattled and engines hissed incessantly. Above all other sounds rose the staccato "rat-tat-tat" of scores of riving hammers. Far up the Forty Mile Valley of the Bow this sound was borne; it reached from cliff and crag on gray Mount Rundle. It shattered the silence in the deep green woods that clothe the valleys and the mountain slopes.

Throughout this extensive forested area around Banff and Lake Louise, many woodpeckers are to be found at all seasons of the year. To these feathered foresters came the sound of the riveters at work; it was interpreted by them as the noise of a host of tree boring birds, hammering and drilling in the bark and timber of

Stony Plain and District.

Mrs Ed Sommerfield is visiting, this week, with relatives at Ledue.

Mrs Carr and Miss Mabel Carr left Sunday for Oklahoma, for a visit with Miss Carr's grandparents.

A meeting will be held in Wudel's Hall under the auspices of the Baptist Church of Glory Hills on Sunday, July 10. The meeting will begin at 8 p.m., and will be conducted in both German and English. The band will furnish the music.

At the meeting, last week, of the W. I. Girls Club, two delegates were appointed to represent the club at the annual convention at Banff. The delegates are: Miss Esther Wolfe and Miss M Robbins, and these left Tuesday morning for the convention. Other members of the club are spending a vacation at Edmonston Beach; these being: The Misses Hazel & Bessie Leeder, Lydia Zucht, Lydia Robbins, E Umbach, Queenie Werner, L Comestiro.

The handsome cup in the window of the Stony Plain Hardware is attracting much attention. The cup has been donated to Stony Plain Rifle Club by the Northwest Brewing Co., and will be competed for during the ensuing season. \$25 in cash has been donated by the King Edward Hotel management. A very generous donation has been promised by Calgary Brewing & Malting Co., which is expected to arrive about the time of the annual banquet.

A large turnout was present, Thursday afternoon, at the annual picnic of Blueberry school pupils. Games at various kinds were run off, for valuable prizes. The committee in charge are to be congratulated on the success of the affair.

Hilding Larson, Geo Scott, Arthur Burger and Leonard Woodley have gone to Calgary, with all expenses paid, as guests of the Alberta Rifle Association.

The Muir Lake School games were held Thursday last at the school grounds and were keenly contested. A large crowd was present and enjoyed the proceedings in a very hearty manner.

Holborn U. F. W. A. are giving a dance at Holborn Hall Friday July 8. Barnes' orchestra.

Dr G B Thurston, dentist, is taking a vacation at present and will discontinue his trips to Stony for a short time. He will resume his practice the latter part of July.

Spruce Grove News

A picnic and celebration is being held today (Thursday) at Winterborn Community Grounds, by St. Joseph's Parish.

Spruce Grove M. D. Councilors met on Monday, with Reeve Sinclair in the chair.

Mr and Mrs Shaw, who have been visiting with Mr and Mrs Ferguson Smith, leave next week for Toronto and New York.

Duffield's Annual Picnic, Saturday, July Sixteenth.

Dominion Day Celebration

Stony Plain's celebration of the Diamond Jubilee on Friday last proved to be a great success. Splendid preparations had been made for the celebration, and the fine manner in which the whole affair was conducted was the cause of pardonable pride on the part of those citizens who had devoted so much of their time to the preliminaries.

The Weather Man was gracious, and favored Stony with as fine a day as could be wished.

Not the least interesting feature of the day was the parade of the school children, in costume. The ranks of the pupils from the local schools had been augmented by the scholars from nearby districts. The arrangement of having each province of the Dominion represented by a group in the parade was carried out, to the minutest detail, and made a very pretty spectacle.

After the children came the automobiles, most of which were decorated in a handsome manner.

After lunch, the platform features were given, commencing with addresses appropriate to the occasion. These were followed by some numbers by scholars from the various schools. Then the program of sporting events.

The day's program wound up with a grand ball in the evening, at which more people wished to be admitted than the hall could accommodate.

Bright Bank News

The Messrs Clausen expect to start sawing on the Sadick quarter within the next few days.

Considerable "breaking" is being done in this district, this season.

Mr Cassan, our popular teacher at Hansen's Corners, held a picnic for the school children on June 30. On account of this school being closed so long, the Board has decided to run it straight thru without any summer holidays.

Mr Osborne Erickson is visiting with his brother, Mr Dave Erickson.

Mr H F Smith of the Metallic Roofing Co., Winnipeg, stopped off for a short visit with his father H Smith of Duffield and his sister Mrs H L Stirling, on his way East, from Vancouver.

Mr Jack Macdonald has gone west, to work on a saw-mill outfit.

Miss Doris Stirling has returned home for the holidays, from Victoria High School.

Golden Wedding Celebration.

Mr and Mrs Henry Oppertshauser celebrated their golden wedding anniversary on Sunday last, July 3d. The worthy couple had been married July 1st, 1877, in Elmira, Ontario, by the Rev John Ernst.

Mr and Mrs Oppertshauser came west, with their family, in 1900, and settled a short distance from the present Spruce Grove, where Mr Oppertshauser took up farming; later on moving to Stony and engaging in the hardware business.

There were present at the celebration four sons, Otto, Henry, George, of Stony Plain, and Charles, of Enderly, B. C.; four daughters, Mrs W M Washburn, Mrs Geo Rehkopf, Mrs Forbes Groat, and Mrs Richard Phillie (Edmonton). There were three other daughters, living at a distance and unable to be present.

Thirty-six grandchildren were present at the celebration.

The couple were the recipients of many congratulations from their large circle of friends and acquaintances. Two beautiful leather-covered chairs, one a rocker and a gent's arm chair, were among the presents received.

Wheat Pool News Notes.

The reports coming in to the Alberta Wheat Pool head offices from various parts of the Province, and the constant stream of Second Series contracts which every mail brings in, indicate that the drive for the sign up is going over in fine shape. Canvassers who have covered their districts state that many non-Pool members are joining up, and the great majority of old members are signing the new contracts.
